

# DEVELOPING CHILDREN'S LIVES THROUGH BERITA HIDUP CHILD CARE

BERITA HIDUP child care centers are scattered over the three main island groups of the Indonesia namely; Java, Sumatra, and Sulawesi. More than five hundred children from poor families are being fed snack and full meal five times a week.

BERITA HIDUP at present maintains 32 feeding centers providing destitute children with food, vitamins, clothing, school needs and medical assistance.

Most children admitted to the center are malnourished and shy. After few months, changes begin to show in their physical and social lives. Once thin and shy now they have gained weight and can mingle with other children easily. They participate well in the centers' activities. In between meals, these children are taught how to read and write to prepare them for school.

Most important and foremost, Bible truths are imparted to them and they are given the opportunities to respond to the gospel.

In school, the children coming from BERITA HIDUP centers far better academically than their peers. Parents are also added to the fold of Christ through this ministry. Bible Studies are conducted for the parents in the centers and homes regularly.

## Services:

- Feeding children at least 1 full meal a day for five days a week.
- Provide clothing
- Developing Christian values in early childhood.
